WORK EXPERIENCE

Intern

Comtrade Group [18 Jul 2022 – 29 Jul 2022]

City: Sarajevo

Country: Bosnia and Herzegovina

I was taking part in a 2-week internship, focused on developing modern software solutions for small companies. I worked in a 6 person team where we focused on developing 3 mobile applications.

- Worked as UI/UX designer where I designed the looks of all 3 apps and managed some of the logic that apps were using.
- Managed team logistics on meetings and managed tasks
- As a result we created 3 apps (1 for warehouse management, 1 for HR vacation management, and 1 app for task management)

IT Support

Nexus ICT d.o.o Sarajevo [18 Jun 2021 – 13 Sep 2021]

City: Sarajevo

Country: Bosnia and Herzegovina

Worked as an IT support in all the sectors of the company. Because this was my first work experience in the IT sector, I was working on all the areas that included any kind of communication, programming, and connecting computers. I also worked with Cisco Packet Tracer, where my main job was connecting laptops with computer networks and debugging the problems that occurred and disabled the network from working how it should work. Also, I did some programming where we worked on the editing databases of the company with SQL and PHP and some minor programming with Python.

Video Editor, Videographer

HeeDee Studios [8 Oct 2021 – 9 Jan 2022]

City: London

Country: United Kingdom

- **Business or sector:** Information and communication

I was working with clients and was giving them consultations on how their websites should look and how we can improve the overall look and performance of the websites. Sometimes I was talking with clients on the phone, but mainly my focus was on filming videos with " Loom " software and sending those videos to them. The content of the videos was me explaining how we will rework the design and UI of their websites and web applications.
